One partner, end-to-end

RDGS TECH INDIA PRIVATE LIMITED partners with public and private organisations to supply skilled manpower, deliver training and build custom software. We bring the people who run your business and the systems that power it together under one accountable partner — with compliance built into every engagement.

Staffing & Manpower

End-to-end recruitment, contract staffing, bulk hiring and payroll — screened and compliant.

Software Development

Custom web & mobile apps, automation, dashboards and cloud, built to your requirements.

Security & Training

Trained security personnel, facility management and technical/non-technical skilling.

Services built around outcomes

Staffing & Manpower Hiring

End-to-end recruitment, contract staffing and payroll for industrial, commercial and government operations.

Software Development

Custom web & mobile apps, business automation, dashboards and cloud solutions built to your requirements.

Security Services

Trained security personnel, supervisors and integrated facility management across sites.

Training & Skilling

Technical and non-technical training for industry, PSU and corporate teams.

Consulting & Automation

Industrial automation, product design and process consulting with measurable outcomes.

Data Services

Data entry, analytics, reporting and business intelligence for informed decisions.

Staffing & Manpower Hiring

We build and deploy the right workforce fast — screened, compliant and ready to perform. From a single specialist to hundreds of site workers, RDGS handles the full hiring lifecycle so you can focus on operations.

1 Permanent & Contract Staffing

Full-time, contract and temp-to-hire placements across skilled, semi-skilled and unskilled roles.

2 Bulk & Project Hiring

Rapid mobilisation of large teams for plants, projects and seasonal demand across India.

3 Payroll & Compliance

PF, ESI, labour-law and statutory compliance managed end-to-end, so you stay audit-ready.

4 Executive & Technical Search

Curated talent pools for engineering, supervisory and management positions.

Software Development

Our in-house engineering team designs and builds software that runs your business — from customer-facing web and mobile apps to internal automation and analytics dashboards.

1

Web & Mobile Applications

Responsive websites, portals and cross-platform mobile apps built with modern frameworks.

2

Business Automation

Custom ERP/CRM workflows, HR and payroll tools that remove manual, repetitive work.

3

Dashboards & Analytics

Real-time reporting and BI dashboards that turn your data into decisions.

4

Cloud & Integrations

API integrations, cloud deployment and maintenance with reliable support.

Technology stack

PHP
